

Market systems form a crucial cornerstone in energy marketplaces. When it comes to developing and effectively supporting these systems you need a trusted and established provider who is in this business for the long run.

PSC Market Systems services

- ▶ Vendor neutral, objective advice and support
- ▶ The full spectrum of product knowledge
- ▶ End to end solutions
- ▶ Practical, internationally informed people
- ▶ Commitment to support for the long term
- ▶ A collegial work ethic
- ▶ A trusted and proven reputation

(Our capabilities are listed in more detail overleaf)

PSC has a proven reputation for excellence as an independent, leading market system and applications service provider.

Our internationally experienced team has broad energy market systems skills and a wide knowledge base. We blend software and engineering reviews, testing, development, application and support to deliver solutions optimized to our client requirements.

FROM PLANNING TO SUPPORT

On any energy market system project, anywhere in the world, PSC can lead the early stages of project development, feasibility, costing, specification, engineering and design, software development, application, testing, commissioning through to operations and maintenance support and advice.

PSC is the complete full service provider of energy market system services, providing recent and relevant software and engineering knowledge and expertise, coupled with pragmatic, hands-on implementation.

VENDOR NEUTRAL EXPERIENCE AND SKILLS

PSC offers broad, vendor neutral, objective software and technical engineering expertise.

Our team brings practical, hands on international experience in supporting, enhancing and upgrading custom and commercial energy market systems.

We also offer expertise in key energy market system related fields, including control systems, telecommunications and IT networks.

AGILE APPROACH

PSC offers an extensive global network of locally-based, yet highly mobile consultants. On the ground, our people work side by side with our clients, tailoring their skills to support, enhance and upgrade our client's systems and applications to meet their particular requirements.
